

SQ-3100

Video Conference Handset Cradle

Video Conferencing At Your Desk And On The Move

The **SQ-3100 Video Conference Handset Cradle** extends the functionality of the SQ-3000 Video Conference Handset combining the convenience and mobility of a handheld, with the functionality of a desktop phone.

- **Mains Power Operation**
- **Wired Network Connection**
- **Enhanced Speaker Phone Operation**
- **Stylish and Convenient Desktop Video Conferencing**

The SQ-3100 provides mains power operation and charges the phone battery enabling 24/7 operation whilst in the dock, with six hours of voice call time or three hours of video call time when on the move. It provides a wired network connection, reducing load on the wireless network. The SQ-3100 also enhances speaker phone volume and quality and enables control of the position and angle of the video image creating the ultimate user experience, at the desk or on the move.

The **SQ-3000 Video Conference Phone** is a dual band Wi-Fi (802.11a and 802.11bg) SIP phone and standards based (H.264) video conference system, enabling video conferencing between SQ-3000's or between SQ-3000's and other H.264 video conference systems. With inbuilt video camera and 2.8 inch 240x320 pixel touch screen it can record high-definition clips at 30 frames per second and play video clips in H.264 format.
