Location Manager

The New Upgraded Siracom M.T.D.S

Meru Technical Demonstration Suite

The Siracom Meru Technical Demonstration Suite (MTDS) is available to help resellers demonstrate the power of the Meru solution, by providing the wireless infrastructure, management and devices to run data, voice, video and multimedia applications, in high user density configurations over a Meru wireless network.

The MTDS has been upgraded with new devices. It now boasts 60 laptops, and the ability to demonstrate dual stream, dual band (abgn) devices connected at 300 Mb/s. It also includes I-Pads, I-pods, and the latest I-phones.

We've upgraded to the latest access points including AP320i and AP1000i, and added Meru's latest management tools including SA200, Location Manager, Spectrum Manager, Service Assurance Manager.
